

July 30, 2015

Dear Examiner,

This letter is to request a Class # Permissive Change for:

FCC ID: TYD-CS41920

IC: 8471A-CS41920

The design changes filed under this Permissive Change application involve added filtering and high-frequency noise bypass to the audio microphone input. The change allows for decreased audio noise and added clarity at the receiver end of the audio link. This change did not modify or change or modify any aspects of the RF design in the product.
